Distribution of Office Labor

M & R. Dept. — Fiscal Year 1927.

Sept. M & R. Dept. — \$3000⁰⁰ to Administration.

Senior Clerk — 2300⁰⁰ { 1150⁰⁰ " "
1150⁰⁰ to Refinery.

Clerk. — 1860⁰⁰ all to Ingot.
(Chgd to M & R. Dept.)

Wigher in Make Up Room.

\$5⁵⁰ per diem — 3/4 to Ingot
1/4 to Refinery.

Distribution of Labor Cost of Ingots

by Denominations, Fiscal 1927.

Calculate total labor charged to Ingot room by month - except preceding July (vacation month)

Classify all melts by denomination to their respective months.

Divide total melts of each denomination in a given month by the number of melts of each denomination melted per die.

Divide the total cost of all denominations in the given month by the total of the quotients to secure "the constant" of all denominations in that month.

Multiply "the constant" by the total number of melts of each denomination, and the result will be the proportionate labor cost of each denomination for that month.

May 17 Doorkeeper wanted pass from G.S. to cover "15 minutes late for yesterday morning" (May 16th). — Pass supplied for doorkeeper (signed by Mr. Wagon). G.S. then takes matter up with Chief Clerk Hinrichs, pointing out his belief that he should be entitled to 8:15 A.M. arrival time to equal time employed with remainder of clerical force. (Thrs). — that the extra 15 minutes makes $7\frac{2}{3}$ additional days per year (on the 313 basis) — and that G.S. would always be at the Mint at 8 A.M. anyway, whenever it was imperative to do so — that he always has been and is willing to work overtime, when necessary, and would always be found willing to give, as well as take. Mr. Hinrichs agreed promptly, saying he thought the same O.K.

June 30 Under terms of "Economy Act" R.C. Waters & W.N. Dardis are furloughed permanently this day. They were on extension & had served 15 years & more.

Dec 21 25.10 oz of melt. & burned nickel coins
del'd by Criner to M&R. Criner gave
Cashier good coins piece for piece for
there. $\overline{\text{H}}$

1929

Apr 12 From Directors letter this date:
 "In the case of future short-deliveries of one pound or more, deductions should be made from invoice amounts and payment should be made only for the amount actually delivered. When there are excess deliveries of one pound or more the excess should be taken into the weight account, as separate items, but without value, which will have the effect of slightly reducing the average cost, etc. However, when the excess is material it should be included on the voucher and be paid for."

1941

Jul. 21 Shipment of "40 tons" Cu on 7/12/41
 weighed by Mint came to 79522 lbs
 Invoice called for 80000 "
